

ABSTRACT

Getting in shape has been a very common wish for people. Many write “I wish to down 10 Kg” when they are being asked about their resolution for the upcoming year. No matter what their age or gender many people wish to have those “Perfect” body. Despite the fact that there are literally many ways to achieve the target many peoples still failed to achieve that. When asked to why they failed to fulfill such target. The response are vary from does not find suitable diet to laziness. But in average the biggest problem is that many people do not know what they eat. They just eat according to their “feelings”. Thus, resulted in uncontrolled cravings.

This thesis intend to help people by showing how much calorie they eat, How much calorie they burned, and the amount of maximum calorie they can ate. So they can easily check and review what they have been eaten.

This thesis try to help people by helping they reminded about their target and what to eat. By using this way people will know the limit, and also how much they must work out if they want to eat more. It also intended to help users to achieve their target and also helping them to keep healthy lifestyle. By having an application that keep them reminded about what they eat in mobile hopefully people can be always reminded about healthy lifestyle.

Not only reminding the food already been eaten, but also reminding how much workout have been done by the user so that user can always remember and check how much work they have been done.

DEDICATION

I would like to dedicate this thesis to my mother, father and my brother and sister who are always there to support me and raised me into the man I become today.

I did my best and hope I make all of you proud.

ACKNOWLEDGEMENT

First of all, I would like to give my greatest gratitude to my God and Savior Jesus Christ for the blessings and guidance throughout completing this Thesis. I also would like to express my gratitude to the following people who help me throughout the completion of this Thesis

1. My dear parents, brothers and sisters for the best and biggest support and encouragement during the creation of this thesis and always praying for the best thing happened.
2. Mr. Rikip Ginanjar for always giving a helpful and valuable thesis guidance and knowledge that greatly beneficial for my further education and career.
3. Mr. Nur Hadisukmana, and the other President University lecturers, thank you for the knowledge and experience given in the past three years so it can be very beneficial to me.
4. PJGMO Plus (Yudhistira Gularso, Yohanes deBritto, Christian Jounathan and Yesua Andrew) 3 months of Intense gaming before 3 months of Intense Thesis-ing. If that is not the right way to do Thesis, I do not care what is right.
5. All Big Family of Computing WE ARE AWESOME!!
6. All of my Friends in President University for giving me encouragement everytime we meet.
