ABSTRACT

Getting in shape has been a very common wish for people. Many write “I wish to down 10 Kg” when they being asked about their resolution for the upcoming year. No matter what age or gender many people wish to have those “Perfect” body. Despite the fact that there are literally many ways to achieve the target many people still failed to achieve that. When asked to why they failed to fulfill such target. The response are vary from doesn’t find suitable diet to plain laziness. But in average the biggest problem is that they doesn’t know what they eat. They just eat according to their “feelings”. Thus, resulted in uncontrolled cravings.

“Diet Project” try to help those people by helping they reminded about their target and what they eat. By using this way people will know the limit, and also how much they must work out if they want to eat more. Diet project intent to help users to achieve their target and also helping them to keep healthy lifestyle. By having an application that keep them reminded about what they eat in mobile hopefully people can be always reminded about healthy lifestyle.

This thesis intend to help people by showing how much calorie they eat, How much calorie they burned, and the amount of maximum calorie they can ate. So they can easily check and review what they have been eaten.

Not only reminding the food they have eaten Diet Project also reminding how much workout have been done by the user so that user can always remember and check how much work they have been done.
